### ***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

Examiner concurs with Applicant's remarks of 9/11/03 that distinguish the instant invention from the prior art. That is, the step of controlling the density of the ferrofluid to a substantially constant value by means of a *vertically* orientated magnetic field generated by a C-dipole, an open dipole (O-dipole), or split pair electromagnet or permanent magnet renders the invention novel and non-obvious over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

Any references not explicitly discussed above but made of record are considered relevant to the prosecution of the instant application.
